

## Remembering Ramanujan: An Interview

By [Math Nomad](#) | Dec 22, 2015

Prof B Sury, an algebraic number theorist working at Indian Statistical Institute, Bengaluru comments on his observations of Ramanujan's life and works. He also invites you to a quick take on contemporary (Indian) mathematical history and how Ramanujan's work inspired the subsequent trailblazers.

The second half of the video has a more serious discussion on Ramanujan's impact on themes that are at college level.

This is Math Nomad's first video.
