

Evolution of Mirrors & Lenses: A Story

By [Jaai Uday Phatak](#) | Sep 19, 2018

Seeing is believing, they say. To see it better we need mirrors and lenses. Here's a story of that and a crossword to solve as an added bonus. Use this resource before you start the chapter on 'Light'.

Jaai Uday Phatak prepared this Resource for School teachers as a part of his course submission under Curricular Material Development at Azim Premji University.
