

## Handbook of Environmental Education Activities

By [Worth Sharing](#) | Mar 12, 2019

The activities in these handbooks developed by Centre For Environmental Education have been made to encourage students to observe and explore their environment; to understand relationships in nature, and between humans and nature; and to learn better how humans are an integral part of the intricate web of life. We believe that learning can be more fun, both for the student and the teacher, when based on real experiences.
