

Best of Arvind Gupta - Science Skills and Thrills

By [Editor English](#) | Jun 26, 2020

Inspired teachers don't get bogged down by rules and regulations. The weighty state curriculum does not cow them down. Instead, they carve out a special niche for themselves. They have faith in the resources and resilience of children. The limitation of the chalk-and-talk method are well known. They know that "activities" constitute great learning and children love them. They involve children as partners in organizing activities. They inspire children to recycle, reuse, reinvent waste into joyous toys and simple science models.

Use this book by Arvind Gupta to inspire your classroom with the loveliest toys made from everyday materials.
