

Earthian programme - Through the lens of Work and Education

By [Learning Curve](#) | Mar 31, 2015

The article introduces Earthian, Wipro's sustainability education program for schools and colleges, and explains the challenges of sustainability and sustainability education. It goes on to describe Earthian's activity based learning program on water for schools and its objectives. Some of the learning outcomes from the program, as seen from the submission from the schools as well as interviews with some of the participating schools, are also shared. The article then tries to see how this program embeds the core ideas of work and education in its design and explores the ways forward for spreading such an approach to learning more widely.
