The study of a river

1. Is there a river near your town or city? Name it.

2. What kinds of fish or other creatures do you find in the water?

3. What kinds of birds do you find near it?

4. What kinds of trees and plants grow around it?

5. Does the water in the river change during the summer, the rainy season and in winter?
6. Has the river ever got flooded?

7. What happens during the floods?

8. Is the water in the river clean?

9. How will you know whether it is clean?

10. How will you make sure you can drink this water?
